

IBE Video Competition

Improving Our World Through Biological Engineering!

In order to excite and inspire the world about the wonders and importance of biological engineering, IBE is hosting a biological engineering student video submission and competition program. Videos should meet the requirements listed below. Each year IBE will honor the best video productions by awarding the top 3 teams at the IBE annual meeting.

See IBE web site: www.ibe.org/videocompetition

Video requirements:

- Video approximately 2-4 minutes long.
- Focus on biological engineering:
 - An exciting research result
 - An inspiring educational activity
 - An interesting or useful experimental technique
 - A mystery, key technical or social challenge, or unanswered question
- Highlight a social challenge, need, motivation, or broader impact associated with the topic.
- Preferably teach at least one biological engineering related concept in an innovative way.
- Contain at least 1 visually compelling sequence
- Involve a team with at least 1 IBE member
- Whenever possible highlight diversity
- Acknowledge/integrate the IBE organization

Each video should be accompanied by a **1-slide summary** (template can be downloaded at web site) whose content will be used for broad dissemination.

Judging criteria:

Quality of presentation

Alignment with video requirements described above

Number of views (over a relevant period to be fair to those who submitted closer to the IBE conference).

Submit your production at the IBE web site (above).

Demonstrate your creativity and passion for biological engineering!
